DXpedition News

Vietnam - 3W 3W8DX and 3W8CW continue to work toward their goal of 100,000 QSO's. They've been worked on 75 and 80 meters at 1440Z from the west coast, especially on 3794 listening above 3800, and 3501 listening up 3. On 40, try 7002 (listening 7007) and 7052 (listening 7175) 15-1700Z. East coast DXers have some success on 14035 kHz 15-1900Z, and 14235 at 1945Z. On 15 meters, west coasters have a good path in early evening: 01-0300Z, while east coast stations do better in the early morning: 1300Z. The same pattern seems to hold on 10 meters, with the west getting through 00-0200Z on 28535 and 28035, while east coast stations have a short window around 1200-1230Z, with some possibilities in the early evening. On SSB, they typically listen 240-260 kHz, and on CW up 5-10 kHz. Even Novices have a shot, as 3W8DX has been on 28495 kHz, listening 28450-90. Sunrise 2300Z, sunset 1030Z. QSL routes are in Issue 458.

Edited by Chod Harris VP2ML

The DX Bulletin

America's Premier Weekly Amateur Radio Publication

Juan Fernandez - CE0 Claudio PY1DFF will operate from Robinson Crusoe Island in the Juan Fernandez (SA-05) Dec. 2-8, mostly CW. 5 kHz up on 40 and 80, 25 kHz up on the higher bands. Usual SSB frequencies. QSL to Jose Roberto Carvalho PY1ROB, P.O.Box 90985, 25621 Petropolis, RJ, Brazil. Claudio has operated from Trindade PY0 in the past. CE0MTY and CE0ICD are also on Juan Fernandez.

Oblast 192 Alex Pashkov is operating from new Oblast 192 as **UA9OA/UJ2K**. QSL direct to P.O.Box 44, Novosibirsk-93, 630093 USSR.

Pacific Tours Peter OH1RY and Vili OH2BAZ wrap up their operations as **ZK2RY** and **ZK2AA** from Niue today, and head home. Hiroo JA2EZD was active as **XX9KA**, and has also returned home. Mats SM7PKK didn't get on from Niue. His next scheduled stop is Tonga A3, through Nov. 24.

November 11, 1988 Issue 462

Reserve Your Island - CQWW CW

- John K4BAI will be on as **8P9HT** from Barbados single-op, all bands. Outside the test Nov. 25-29, he'll concentrate on 1832, 10118, 18070, and 24898 kHz. QSL home call.
- Duane AA6EE will be on as **XE2GCK**. QSL home call.
- Martti Laine OH2BH plans to return to Madiera as **CT9BZ** for the CW test, single-op, all bands. QSL OH2BH.
- And in the ARRL 10 Meter test Dec. 10-11, look for **VP2M/ND3A** in his first DXpedition, operating from The Last Resort. Rob and WB3FSB will be on Montserrat Dec. 6-13, working all bands outside the test. QSL home calls.

Shortly Noted

- JoAn Flower WA2ICE returns to Little Cayman Island as **ZF2ME/ZF8** Nov. 27-Dec. 3, concentrating on 10 and 15 meter SSB. DX nets and free-lance. QSL to WB3CQN.
- Larry Eicher **5N0WRE** is now in Egypt, trying to get on the air. If you need a 5N0WRE QSL, try direct to AMEMB/USFCS, Box 11, FPO New York 09527-7700, with an IRC, or SASE with US postage.
- **4S7NMR** is often on 28551 kHz at 0130Z.
- **WY5L/KH3** leaves Johnson Is. Nov. 14, which will deprive DXers of their best shot at Johnson on RTTY, 6 meters, and the HF bands. QSL to N5DAS.
- **C9MKT**'s next operation is Nov. 25-27.
- Some 20 meter CW regulars: **3B8CF** 14033 kHz at 0230-0330Z; **UI9AAB** 02-0230Z; and **UJ8XDH** from new Oblast 192 around 0245Z.
- On 10-meter SSB, listen for **BY9GA** 28525-535 kHz at 00-0100Z; **HV3SJ** 15-1600Z; **S92LB** 28570-580 at 2100Z; and **FR5FA/J** around 1600Z.

RTTY Notes

- **YI1BGD** has been using the RTTY gear left behind by JR1AIB. Operator Faris QSYed to RTTY from SSB on 10 meters, to 28650 kHz, because his rig doesn't go below 28500. QSL Faris to Box 7147, Baghdad. (QSL other operators to their own PO Boxes, rather than the club's address as listed in the Callbook.)
- 6W6JX will be on from Gambia C5 Nov. 12-13.
- QSL **SU1ER**'s CQWW RTTY QSO's to Box 78, Heliopolis, Cairo 11341, Egypt.
- **UA3TT/RF8F** from Tiblisi, Georgia, is very active on 14093 kHz 03-0600Z. QSL to Box 18, Gorky 603000 USSR.
- **3B8CS** and **3B8FP** are the only Mauritius stations on RTTY.

Islands On The Air

- **N6IV/KL7** operates from Douglas Is. (NA-41) in the Alexander group, especially 14224 kHz at 0830Z.
- **LA6OP** is on Helligvaer Is. in the Donna group (EU-62). He likes 14224 kHz at 0800Z.
- **ZL5BA** is on Ross Island off Antarctica (AN-1). Try Jim Smith VK9NS's net on 14222 kHz at 0700Z. QSL KB4GID.

Reporting DX News

The DX Bulletin is based on news from DXers around the world. We can receive FAX transmission 24 hours a day at (707) 523-0852, telephone calls 24 hours a day at (707) 523-1001 (staffed 16-1800Z and 23-0100Z daily; recorder at other times, and via Compuserve: 75755,737. Thanks. -ed.

Propagation Watch

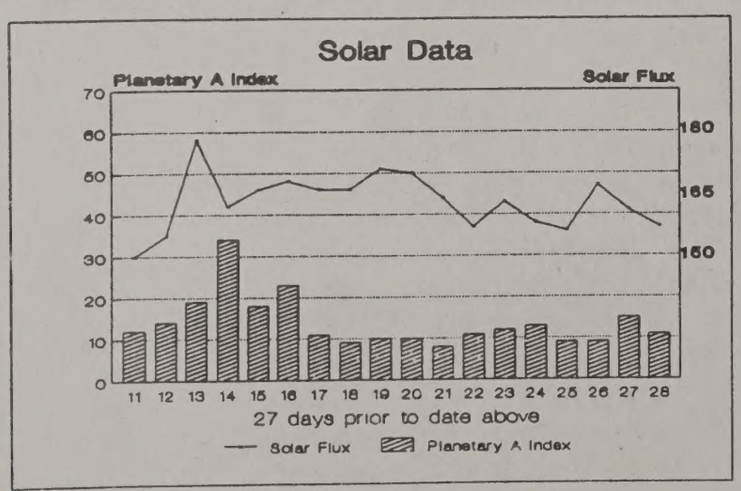
The bands slipped a bit in early November, as predicted, but conditions continued to be good to excellent. We look forward to more of the same for the rest of November, including CQWW CW Nov. 26-27.

Solar flux has remained very steady in the 150-170 range, which is high enough for good propagation on 12 and 10 meters during the day, and for a few hours after local sunset. The residual ionization keeps the maximum usable frequency (MUF) above 20 meters almost all night, and 15 meters also stays open well into the evening hours.

The lower bands have enjoyed very good propagation as well, thanks to long stretches of low geomagnetic activity. 75 and 80 meters yield some choice DX both in the evening on the short path, and around local sunrise, to the west. 40 is also open late at night, and around sunrise.

CQWW CW Propagation Forecast

The early forecast for CQWW CW looks excellent: a repeat of the superb conditions we enjoyed for the SSB test. MUFs may drop slightly, as we approach the winter solstice, but probably not enough to affect the bands significantly. Again, look for DX to the west on the low bands at sunrise, and then to the northeast on 10, 15, and 20 soon thereafter. The higher bands will swing to the south and west during the day, with 20 meters deteriorating around midday. 10 meters will fade out to the northwest a few hours after sunset, followed by 15 meters, but 20 should be open all night over the North Pole. 40 meters opens to the east at local sunset, and again around local midnight to the north. 80 meters is best late into the night, and at sunrise. With continued low geomagnetic activity, the polar path and the long path should be very productive. You can't ask for any better conditions!



Lynx DX Group calls it Quits on 4W0EA

The Lynx DX Group has formally cancelled their plans to operate from Yemen 4W, and returned contributions. Their letter explaining their reasons reads: "Dear Colleague:

"The constant uncertainly in the reception of the necessary and valid documentation for the operation Lynx Dx Group wants to make from North Yemen and the expectation this expedition has caused in all the Dxistas environments has motivated another establishment so much of organization as much as dates by the Lynx Dx Group direction.

"All of us know how difficult is to get some documentation and permissions from some countries qualified as rare into the DXCC list. Normally, these countries are considered into the "Third world" area. There, the public service is very slow and sinuous, something one day is valid, next day is not valid.

"This is the situation of our Group. When it all seemed that the obtaining of the visa by the five operators would be the last difficulty and the operation would be truth at the beginning of October, because of have obtained a valid visa from 21 of July until 21 of October, new problems and insufficient documentation (we think), make us delay the operation until dates we can not say by now. The truth is that the next information will be given just some days before take the plane to San'a, it means that it will be when we have got all the points of this expedition confirmed.

"The Lynx Dx Group wants to thank the institutions, associations and colleagues that offered us their economic support (that we give back now) and regrets the false expectations made with this theme of 4W0EA, hoping that in the next times we could conform at once the realization of the expedition."

(s) Lynx DX Group

Russian/American River DXpedition

Alex Pashkov UA9OA reports on a joint US/USSR rafting trip:

"In 1988 from August 4 through 13 on the Ob River, the Soviet-American Raft Expedition took place. Each day from every stop the radio station **EK9AO** was operated by two Novosibirsk hams: UA9AO and UA9OJY. During 104 hours of operation, we made 4,000 QSO's with 86 countries. Unfortunately, we did not make many contacts with USA hams, due to poor conditions. And there was another reason: the raft usually started sailing at 9-10 AM (01-0200Z), while the short path propagation just opened.

"The QSL may be sent to my address: P.O.Box 44, Novosibirsk-93, 630093 USSR, or via the bureau.

"The members of the expedition are extremely thankful to Had KS7P from Portland and Vern KU0S from Saint Paul for their help in setting the contacts with the "Connect US-USSR" group, Minneapolis, which has managed the trip of American friends to the USSR.

"Next year a similar trip, hosted by the US, will travel down the Mississippi River. The group of 20 children and 4 adults will come to the States, but I could not push myself into the group, since I am not a "Kon-Tiki" member, Of course, my dream is to travel along the Mississippi River on a raft and disturb the air on all bands."
